

AJR NDC NOMINAL DEPTH CARTRIDGE, PLEATED FILTER FOR NUMBER 2 BAG VESSELS

More surface area means the cartridge will last longer than a bag filter, equals less change outs.

The unique design of this pleated cartridge provides 5 to 10 times the surface area depending on the micron. Dirt holding capacity and efficiency are maximized by pleating two layers of nominal felt to create a pre-filter and final layer.

Size #2 length 26" | 1 micron 25 sq-ft of media | **Usual lead time 3 weeks**

Micron ratings from 1-200, Fits most Size #2 strainer baskets, Polypropylene materials meet FDA regulations for food contact under CFR21, Section 177.1520, Broad Chemical Compatibility, Temperature ratings to 200°F, Silicone-free construction
