# GOULDS AQUAFORCE TRIPLEX BOOSTER SYSTEM 3SV12- 460V

One Pump - 16 GPM @ 330 FTH.
Two Pumps - 32 GPM @ 330 FTH Three Pumps 48 GPM @ 330 FTH.
Material - Cast Iron/304SS.
Mechanical Seal Car/Silcar Viton.
Connections 2" Grooved

**SKU:** FG-HVL3D2-3SV12GF4F60 **Stock:** Out of stock contact us for

lead time

**Categories:** Goulds Booster Skids

Part Number FG-HVL3D2-3SV12GF4F60

## PRODUCT DESCRIPTION

**Goulds AquaForce Booster Systems.** Every e-HV station is provided with rugged 304SS base and framing, common 304SS grooved suction and discharge manifolds with required pump fittings and is fully NSF/ANSI 61 & 372 certified for potable drinking water. Each pump is outfitted with a master Hydrovar® variable speed pump control/VFD with individual pump disconnects ensuring full redundancy for systems that require no downtime.

www.pfcestore.com - 763-425-7890 / 800-328-2350

Each station is fully tested for flow and pressure and comes programmed ready to install

### **CERTIFICATIONS**

- •ASHRAE 90.1-2016 Compliant
- NSF/ANSI 61 & 372 Certified
  - UL CQCZI
    - cUL
    - UL508A
      - NFC

Estimated delivery is 3 to 4 weeks - Please contact us for current delivery

# Features that make a difference

#### 1. Hydrovar Variable Speed Pump Control/VFD

The e-HV comes standard with Xylem's proven Hydrovar variable speed pump control/VFD for pressure boosting applications. Standard NEMA 1, mutli-master configuration make the e-HV the obvious choice for your critical applications.

#### 2. Individual Pump Disconnects

With integrated through the door pump circuit breakers located in a NEMA 12 station disconnect enclosure, the e-HV allows for ease of service without the need to shut down the entire Booster package.

#### 3. Premium Efficient

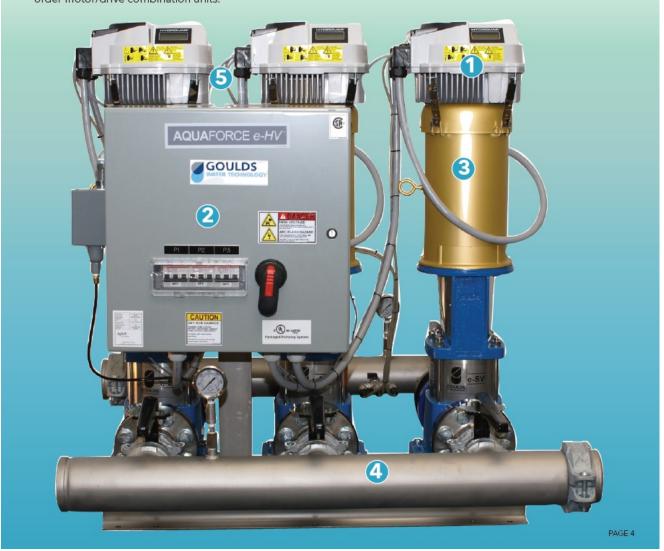

The e-HV utilizes off the shelf TEFC Premium Efficient NEMA Frame motors, eliminating the need for special order motor/drive combination units.

#### 4. Stainless Steel

Corrosion? Not with e-HV. With a standard 304SS base and framing you can feel confident in placing the e-HV in almost any location. And as always, the 304SS grooved suction and discharge manifolds allow for simple installation into any piping system.

#### 5. Compact

By utilizing items such as our Hydrovar with molded wiring harnesses, e-SV pumps with minimal spacing and optimized pump trim, we have been able to deliver high performance in a compact system.
