# GOULDS AQUAFORCE TRIPLEX BOOSTER SYSTEM 5SV6- 460V

One Pump - 32 GPM @ 145 FTH. Two Pumps - 64 GPM @ 145 FTH -Three Pumps 96 GPM @ 145 FTH. Material - Cast Iron/304SS. Mechanical Seal Car/Silcar Viton. Connections 3" Grooved

SKU: FG-HVL3D3-5SV6GE4F60
 Stock: Out of stock contact us for lead time
 Categories: Goulds Booster Skids

**Part Number** FG-HVL3D3-5SV6GE4F60

# **PRODUCT DESCRIPTION**

**Goulds AquaForce Booster Systems.** Every e-HV station is provided with rugged 304SS base and framing, common 304SS grooved suction and discharge manifolds with required pump fittings and is fully NSF/ANSI 61 & 372 certified for potable drinking water. Each pump is outfitted with a master Hydrovar® variable speed pump control/VFD with individual pump disconnects ensuring full redundancy for systems that require no downtime.

# Features that make a difference

### 1. Hydrovar Variable Speed Pump Control/VFD

The e-HV comes standard with Xylem's proven Hydrovar variable speed pump control/VFD for pressure boosting applications. Standard NEMA 1, mutli-master configuration make the e-HV the obvious choice for your critical applications.

### 2. Individual Pump Disconnects

With integrated through the door pump circuit breakers located in a NEMA 12 station disconnect enclosure, the e-HV allows for ease of service without the need to shut down the entire Booster package.

### 3. Premium Efficient

The e-HV utilizes off the shelf TEFC Premium Efficient NEMA Frame motors, eliminating the need for special order motor/drive combination units.

### 4. Stainless Steel

Corrosion? Not with e-HV. With a standard 304SS base and framing you can feel confident in placing the e-HV in almost any location. And as always, the 304SS grooved suction and discharge manifolds allow for simple installation into any piping system.

### 5. Compact

By utilizing items such as our Hydrovar with molded wiring harnesses, e-SV pumps with minimal spacing and optimized pump trim, we have been able to deliver high performance in a compact system.
