Model Number 015-090/8.27AASG6S2ESBQQEQX2 Part Number 92559387

PRODUCT DESCRIPTION Benefits

• 35 % smaller footprint than frame mount design

www.pfcestore.com - 763-425-7890 / 800-328-2350

- Rapid mechanical seal access without motor removal
 - Lifetime of no alignment
 - Footed volute and motor require no base
 - No grouting
- Integrally cast diffuser vane reduces turbulence and need for suction guides

11.1.8 Shaft seals

(0 °C) are mainly intended for coolants.

The operating range of the seals is described for two main applications: pumping of water or pumping of coolants.

Seals with a temperature range of 32 °F (0 °C) and up are mainly used for pumping water, while seals for temperatures below 32 °F

We do not recommend that you operate the pump at maximum temperature and maximum pressure at the same time, as it results in reduced seal life and the occurrence of periodic noise.
