Model Number 99463939

Part Number JP PS 16 05 154

PRODUCT DESCRIPTION

Grundfos JP PS is a self-priming single-stage centrifugal jet pump with axial inlet and radial outlet for easy adaption to local pipe system.

With its excellent suction capacity, the JP pump is ideal for transferring water from wells or ground tanks in a large variety of installations.

It features an integrated pressure switch that automatically starts the pump according to demand. We recommend adding a diaphragm tank, which

increases system comfort by compensating for pressure drops when a tap is opened.

A diaphragm tank moreover reduces problems with water hammer in the pipes.
