pump life with minimal routine maintenance.

FEATURES

- Progressing cavity pump principle ensures steady output pressure and non-pulsing flow with minimal slippage-a very useful feature when pumping heating oil to burner nozzles for example
- Smooth action and resilient rubber stator ensures quiet running-ideal for light industrial and domestic installations
 - Simple design and easy dismantle
- An abrasion and chemical resistant stator for handling viscous liquids and random solids
- Available as cast iron, stainless steel or engineered co-polymer bodies
 High quality stainless steel rotating parts
 - Available either bareshaft or coupled with a motor

TYPICAL APPLICATIONS

- Dosing applications
 - Light creams
 - Shampoo
 - Cosmetics
 - Diesel/fuel oils
 - Water sampling
- Hydraulic/lubricating oils
 - Cellar drainage
- Septic tank/cesspit emptying
 - Garden sprinkler systems
- Water supply from wells or rivers
