pump life with minimal routine maintenance.

FEATURES

 Progressing cavity pump principle ensures steady output pressure and non-pulsing flow with minimal slippage-a very useful feature when pumping heating oil to burner nozzles for example

• Smooth action and resilient rubber stator ensures quiet running-ideal for light industrial and domestic installations

• Simple design and easy dismantle

• An abrasion and chemical resistant stator for handling viscous liquids and random solids

• Available as cast iron, stainless steel or engineered co-polymer bodies

• High quality stainless steel rotating parts

• Available either bareshaft or coupled with a motor

TYPICAL APPLICATIONS

• Dosing applications

- Light creams
 - Shampoo
 - Cosmetics
- Diesel/fuel oils
- Water sampling
- Hydraulic/lubricating oils
 - Cellar drainage
- Septic tank/cesspit emptying
 - Garden sprinkler systems
- Water supply from wells or rivers
