Model Number EJ-B21SHURN

**Part Number NA** 

## **PRODUCT DESCRIPTION**

## High Speed Performance

The EJ Series operate at 360 strokes-per-minute, providing high resolution chemical feed and high turndown capability. Most competitive products operate at slower speeds, resulting in slug feeding, accelerated diaphragm wear and poor feed control.

# Universal Voltage

The Universal Voltage Function enables the EJ Series to operate at any AC voltage. The EJ Series also conform to global Standards.

External Control

#### www.pfcestore.com - 763-425-7890 / 800-328-2350

The EJ Series have both digital input and Stop/Start inputs built into the pump, enabling either proportional or On/Off control.

### IP65 Equivalent Protection

A robust housing protects the pump from normal wear. Mounting the Digital Display and Key Pad control within the drive housing creates a highly water resistant design. A clear cover further protects the pump from liquids.
