PRODUCT DESCRIPTION

Yamada AOD Pump

G15 Global Series 1/2" AODD pumps provide a maximum flow rate of 16.6 GPM and are available in Aluminum, Stainless Steel (316), Pure Polypropylene and Kynar. We offer a wide selection of diaphragm materials that cover a variety of applications.

Yamada pumps utilize a Step Spool (S-Spool).

Yamada Global Series pumps do not have an independent pilot valve system (less parts) and consume less air versus the competition. Available with multiport options, these AODD pumps perform extremely well in continous stop/start operations and provide exceptional suction lift.

Estimated delivery 2 weeks
