

GUSHER PUMPS

CL-CC Series

General Service Industrial Pumps

A RUTHMAN COMPANY

CL-CC Series Horizontal Pumps

For general service pumping or industrial services, the CL-CC Series is a perfect reliable and economical solution. The close-coupled design and ANSI dimensional casing make installation extremely simple.

The CL-CC Series is also easy to operate and maintain with the added benefit of a substantial reduction in maintenance costs.

Key Specifications

Type: Centrifugal, End Suction

Flow: Up to 1600 gpm

Head: Up to 700' TDH

Liquid Temp: Max 250° F

Max Pressure: to 300 PSIG

Motor Type: NEMA JPM Shaft Motor

Intake: 1.5-6"

Discharge: 1-4"

Features

- Compact, space-saving close-coupled design eliminates manual pump/motor alignment to simplify installation
- Back pullout design reduces service downtime
- Renewable shaft sleeve protects shaft from wear
- Self-Setting Mechanical Seal prevents leakage
- Semi-enclosed impeller handles light solids

Options

- Cast Iron and 316 Stainless Steel construction
- Foot Mounted Casing
- Drip-proof, fan-cooled, or explosion-proof motor

Low Maintenance

- Long service life
- Back pullout design
- Renewable shaft sleeve

Custom Design

- Choice of materials
- Choice of JPM shaft motor type

Applications

- Water Purification/Filtration (Reverse Osmosis, Ultra Filtration)
- Parts Washers
- Deionized Water
- Tank Transfer, Tank Cleaning
- Bottle Washing
- Waste Water
- Scrubbers
- Paint Systems
- OEM Skids
- Seal Water
- Condensate
- Boiler Circulation
- Cooling Water
- Electronics Cooling Chillers
- Batch Processing

Performance Curves

A Complete range of NEMA JPM Shaft motors are available

Gusher Pumps CL-CC Series

General Service Industrial Pumps

Design Features for a Wide Range of Industrial Services

Close-Coupled

Design eliminates need to perform time consuming pump/motor alignment.

NEMA JPM Shaft Motor

Commercially available motors eliminate need to stock "special" motors. Available in open drip-proof, total enclosed fan-cooled and explosion-proof.

Renewable Shaft Sleeve

Stainless steel shaft sleeve protects motor shaft from corrosion.

Single Inside Mechanical Seal

Elastomeric bellows seal making it simple to install, easy to maintain.

Cast Impeller

Casing Drain

Rigid Casing Feet

Reduces effect of pipe loads on pump performance. Facilitates back pull-out for ease of maintenance.

Industrial Duty Casing

Cast with generous wall sections, provides extended pump life on corrosive/erosive service. ANSI dimensional for ease of installation. ANSI Class 150 flanges are standard.

CL-CC Series Parts List

Ordering Information

Order the Gusher CL-CC Series Pump to meet your needs by model name. The model name should be specified as follows:

Back Pull-Out Design Max Size Impeller Close-Coupled Material (See Chart Below)

PCL X X SE - CC - 4 -

Center Line Discharge Size Suction Size Semi-enclosed Impeller 12 O'clock Discharge Position

Materials of Construction		
Material Designation	Type	Description
A	All Iron	Cast Iron Construction
B	Stainless Steel	316 Stainless Steel Wetted Parts
C	Stainless Steel Fitted	316 Stainless Steel Shaft and Impeller

Ruthman Companies: A family-owned business supplying pumps for over 100 years

Ruthman Companies was co-founded in 1912 by brothers Alois and Edward Ruthman as the "Ruthman Machinery Company." Based in Cincinnati, the company serviced the steamboats that traveled the Ohio River. In 1924, Alois conceived the first seal-less centrifugal pump, coining the term 'coolant pump.' The brothers named this new pump "Gusher," giving birth to what is now Ruthman Companies' flagship brand, Gusher Pumps.

Alois' son Thomas R. Ruthman joined the family business in 1949, growing the business globally through organic growth and the acquisition of complementary technologies. In the early 1990's, Alois' grandson, Thomas G. Ruthman, became the third generation of Ruthmans in the pump business. Over the years, Ruthman Companies has expanded its product line from the original centrifugal coolant pumps to include valves, vertical turbine pumps, positive displacement pumps, gear pumps, and other specialized pump equipment, while upholding its reputation as a leader in the custom engineering of pumps for the most challenging applications.
