

E-SBB Series

Single- & Multi- Filter Bag
Housings w/ Swing Bolt Closure

EndoerTM
Leading Filtration into the Future

Manufactured of AISI304 or AISI316L stainless steel for high-purity industrial filtration requirements. Single-bag housings accept standard Size #1 or Size #2 bags. Multi-bag housings accept 2, 3, 4, 6, 8, or 12 Size #2 bags. Multiple options for porting type and size. Provided standard with upstream & downstream gauge ports and lid-mounted vent port.

Features

- Rugged swing-bolt closure allows easy access for bag change-out.
- Adjustable leg assembly on single-bag models offers installation flexibility.
- 150 psi (10 bar) operating pressure rating.
- Designs adhere to requirements of the ASME Pressure Vessel Code.
- "U" or "CE" Code stamping options are available.
- Can provide flow rates up to 1,200 GPM.
- Surface passivation reduces potential for weld line corrosion.
- Includes drain and gauge ports on both the clean and dirty sides.

Applications

- Suitable for the broadest range of industrial applications from process fluid streams for water, aqueous solutions, oils, and fine chemicals.
- Used in food and beverage production: filtration of juices, syrups, food ingredients, and bottled water.

Product Quality

- Manufactured within an ISO 9001:2015 certified quality management system.
- Halal certified.
- Certification of Quality document can be provided upon request.

Materials of Construction

Shell Components:	AISI304 or AISI316L Stainless Steel
Seal Options:	EPDM (standard), NBR, SILICONE, FKM

Surface Finish

Surface Quality:	Glass beaded finish is standard
	Industrial electropolish is optional

Operating Conditions

Operating Temperature:	121°C (250°F) max.
Design Pressure:	10 bar (150 psi)

Ordering Information

NOTES:

Standard porting for single-bag units:

- "2FN" & "2TC" units are side-in, side-out, & bottom-out
- "3FN" & "2F" units are side-in, side-out, & 2FN bottom-out

Other port sizes, pressure ratings, and optional constructions may be available. Please inquire.
